Figure 1: A complex phylogenetic tree diagram showing the relationships between various taxa, likely related to the genus *Phragmites*. The tree is rooted at the top and branches downwards. The taxa are listed on the left and right sides of the tree, with their corresponding numbers (e.g., 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115) indicating their position in the tree. The taxa names are written in Japanese characters, often followed by a location or habitat in parentheses. The tree is divided into several major clades, with some clades being more densely branched than others. The overall structure suggests a complex evolutionary history with many speciation events.

Figure 1: A detailed phylogenetic tree showing the relationships between 105 taxa, numbered 1 to 105. The tree is rooted at the bottom left and branches outwards. The taxa are listed on the left side of the tree, with their names in Japanese and English. The tree is divided into several major clades, including the 'C' clade (top right), the 'B' clade (middle right), and the 'A' clade (bottom right). The tree is also divided into several major clades, including the 'C' clade (top right), the 'B' clade (middle right), and the 'A' clade (bottom right). The tree is also divided into several major clades, including the 'C' clade (top right), the 'B' clade (middle right), and the 'A' clade (bottom right).
